

ABZ, INC

ABZ, Incorporated is an experienced and innovative engineering consulting firm that provides responsive, high-quality, and cost-effective assistance to industry and government. ABZ's services include risk analyses, litigation support, management audits, operational assessments, cost estimates, fluid flow analysis, and system evaluations. ABZ employs several unique computer programs to meet specific client's needs efficiently and effectively. ABZ's principle consulting services are:

Management Consulting and Risk Analysis

ABZ consults with power industry managers to improve operations, improve regulatory compliance and reduce risk. Specific areas of expertise include:

- Analysis of Safety and Operating Practices
- Management Audits
- Licensing and Safety Evaluations
- Litigation Support and Technical Experts
- Evaluation of Specific Engineering and Technical Issues
- Minimizing Insurance Costs and Reducing Risk

System Evaluation and Fluid Flow Analysis

ABZ evaluates and analyzes complex fluid systems. ABZ's Design Flow Solutions (DFS) provides a range of computer tools to solve fluid flow problems. Specific services and products include:

- New System Design
- Design Verification
- Analysis of System Modifications
- Technical Support to DFS Users
- DFS and Fluid Flow Training

Decommissioning Financial Assurance and Planning

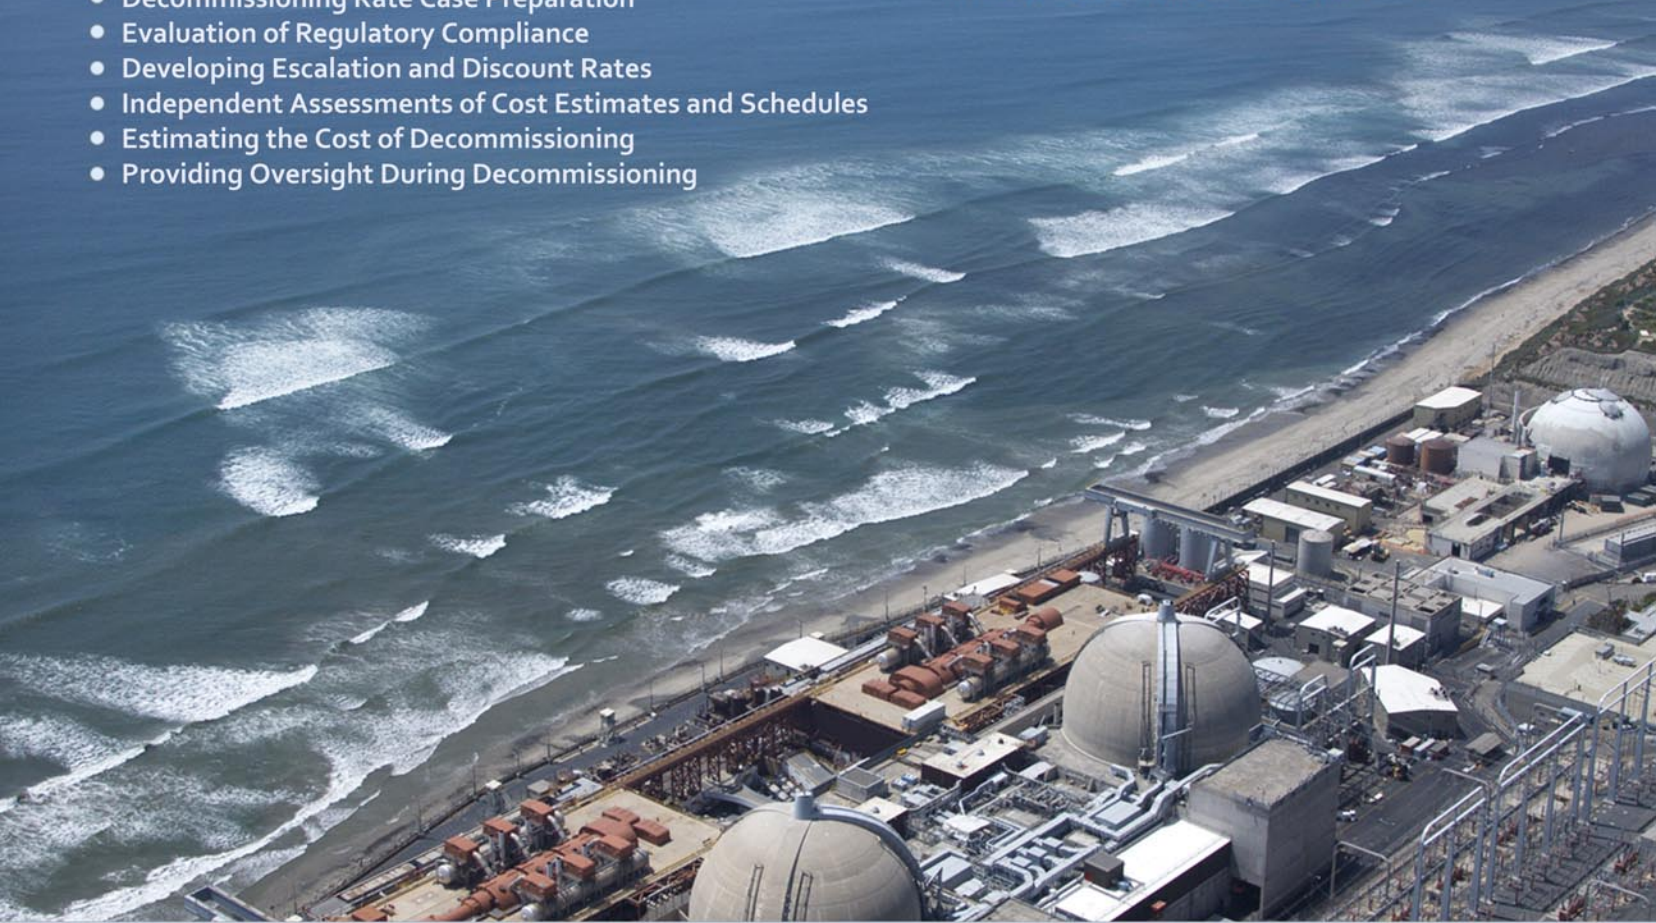

ABZ prepares decommissioning plans and cost estimates.

Specific tasks include:

- Decommissioning Rate Case Preparation
- Evaluation of Regulatory Compliance
- Developing Escalation and Discount Rates
- Independent Assessments of Cost Estimates and Schedules
- Estimating the Cost of Decommissioning
- Providing Oversight During Decommissioning

Partial Client List:

Department of Justice, Nuclear Regulatory Commission, Southern California Edison, Exxon Mobil, New York State Public Service Commission
